

RAM CORPORATE SERVICES & GOVERNANCE PROCESS MANUAL

L0-5 Corporate Services & Enablers

(L0-5 Value Stream)

Value Stream: L0-5 Corporate Services & Enablers
Process Owner: Head of Corporate Services & Governance
Operating Model: Shared Services (Internal Customer / Service Provider Model)
Primary Systems: SAP S/4HANA, SAP SuccessFactors (HR), SAP GRC, SAP Ariba, DMS (SharePoint), Power BI.

1. Process Purpose & Value Proposition

The purpose of the **L0-5 Corporate Services & Enablers** Value Stream is to provide effective corporate services and strong governance to support strategic decision-making, ensure compliance, manage risk, and deliver value across all RAM managed properties and facilities.

Service Delivery Model (The 99% Rule):

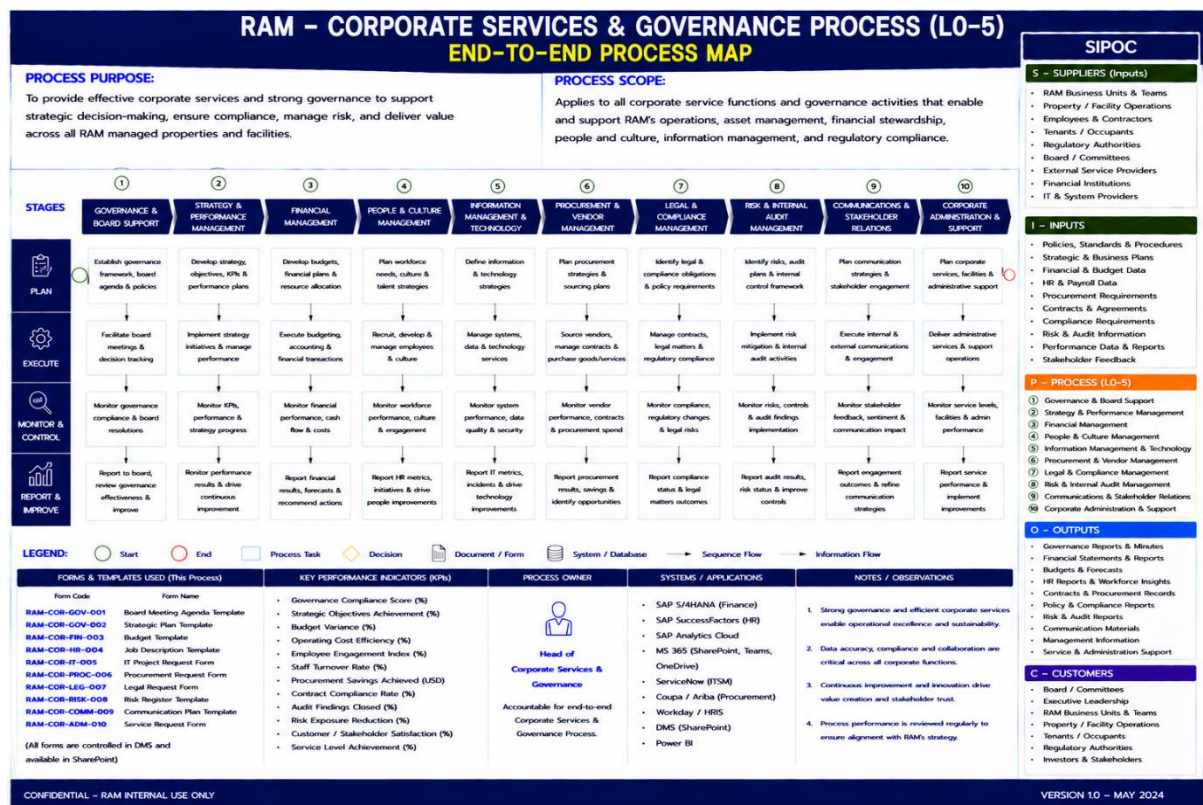

- **Intake:** L0-5 acts as a **Service Provider** to all internal business units (L0-1 to L0-4).
- **Execution:** 99% of transactional work (Hiring, Procurement, Legal Counsel, IT Support, SAP Admin) is initiated via a **Service Request Form** and executed by **Group Shared Services** (Centralized Finance, HR, IT, Legal teams).
- **Governance:** L0-5 handles the *strategic* aspects: Policy setting, corporate strategy, risk oversight, and high-level financial reporting.

Core Objectives:

- **Service Excellence:** Provide reliable, efficient, and measurable support services to internal RAM business units.
- **Governance & Compliance:** Ensure RAM operates ethically, legally, and in compliance with all regulatory requirements.
- **Strategic Enablement:** Support RAM's strategic objectives through accurate financial data, capable human capital, and robust technology.
- **Risk Mitigation:** Proactively identify, assess, and mitigate enterprise-wide risks.

2. High-Level Process Architecture (The 11-Phase Corporate Governance Model)

L0-5 Corporate Services & Enablers

Phase 1: Governance & Board Support

Purpose: To establish and maintain effective governance structures and provide comprehensive board support to enable strategic decision-making.

- **Key Outputs:** Board & Committee Meeting Minutes, Board Resolutions.
- **Key Form:** Board Meeting Agenda Template (RAM-COR-GOV-001).

Phase 2: Strategy & Performance Management

Purpose: To develop and manage corporate strategy, set performance objectives, and monitor performance to ensure RAM achieves its goals.

- **Key Outputs:** Corporate Strategy & Objectives, Performance Dashboards.
- **Key Form:** Strategy Development Template (RAM-COR-STR-001).

Phase 3: Financial Management (Shared Services)

Purpose: To ensure effective financial planning, management, reporting, and control to support sound decision-making.

- **Key Outputs:** Monthly Financial Reports, Budget vs Actual Reports.
- **Key Form:** Budget Template / Capital Request (RAM-COR-FIN-001).

Phase 4: People & Culture Management (Shared Services)

Purpose: To attract, develop, and engage a capable, diverse, and high-performing workforce that aligns with RAM's values.

- **Key Outputs:** Recruitment Plan, Training Plan, Employee Satisfaction Reports.
- **Key Form:** Recruitment Requisition Form (RAM-COR-PEO-001).

Phase 5: Risk & Compliance Management

Purpose: To proactively identify, assess, treat, and monitor risks and ensure compliance with laws, regulations, and policies to protect RAM's assets and reputation.

- **Key Outputs:** Enterprise Risk Register, Audit Reports.
- **Key Form:** Risk Assessment Matrix (RAM-COR-RCM-002).

Phase 6: Stakeholder & Communications Management

Purpose: To build trust, strengthen relationships, and ensure timely, accurate information is shared with stakeholders.

- **Key Outputs:** Stakeholder Engagement Plan, Communication Plan.
- **Key Form:** Stakeholder Register (RAM-COR-COM-001).

Phase 7: Information & Data Management (Shared Services)

Purpose: To ensure accurate, reliable, secure, and accessible information and data to support decision-making, operational efficiency, and compliance.

- **Key Outputs:** Data Quality Reports, Master Data Maintenance Logs.

- **Key Form:** Data Quality Checklist (RAM-COR-IFM-002).

Phase 8: Asset & Facility Management (Corporate Level)

Purpose: To ensure RAM's corporate assets and facilities are maintained and optimized to support operations (e.g., Corporate HQ, IT Hardware).

- **Key Outputs:** Corporate Asset Inventory, Maintenance Reports.
- **Key Form:** Corporate Asset Maintenance Request (RAM-COR-AMF-001).

Phase 9: Communications & Stakeholder Relations (External)

Purpose: To engage stakeholders, communicate effectively, and manage relationships to build trust, enhance transparency, and support RAM's objectives.

- **Key Outputs:** Corporate Communication Reports, Press Releases.
- **Key Form:** Communication Plan Template (RAM-COR-COM-002).

Phase 10: Review & Improve People Practices

Purpose: To continuously review, evaluate, and improve people practices to enhance effectiveness, compliance, and employee experience.

- **Key Outputs:** People Practices Review Report, Policy Update Logs.
- **Key Form:** People Practices Review Plan (RAM-COR-PIP-001).

Phase 11: Report & Enhance Governance

Purpose: To report on governance performance, ensure accountability and transparency to stakeholders, and drive continuous improvement.

- **Key Outputs:** Annual Governance Report, Board Performance Review.
- **Key Form:** Governance Dashboard Template (RAM-SOV-REP-001).

3. SIPOC Framework for L0-5 Corporate Services & Enablers

S – Suppliers	I – Inputs	P – Process	O – Outputs	C – Customers
RAM Business Units (L0-1 to L0-4) Property / Facility Ops External Service Providers Regulatory Authorities Shareholders / Investors HR / Legal / IT Departments	Service Requests (Hiring, IT, Legal) Performance Reports Policies & Procedures Financial Data Regulatory Requirements Audit Findings	Phase 1: Governance & Support Phase 2: Strategy & Performance Phase 3: Financial Management Phase 4: People & Culture Phase 5: Risk & Compliance Phase 6: Stakeholder Engagement Phase 7: Information & Data Phase 8: Corporate Asset Mgmt. Phase 9: External Communications Phase 10: People Practices Review Phase 11: Governance Reporting	Governance Reports Audit Findings Compliance Dashboards Strategy & KPI Dashboards Financial Statements Hired/Onboarded Employees Procured Goods/Services Legal Counsel SAP Support Tickets	Board of Directors CEO / Executive Leadership RAM Business Units Tenants / Occupants Regulatory Authorities Shareholders / Investors Auditors

4. Roles & Responsibilities (Internal Service Providers)

Role	Primary Responsibility in L0-5
Head of Corporate Services & Governance (Process Owner)	Accountable for end-to-end corporate services. Oversees service intake, vendor management, and performance reporting.
Group Finance / Accounting (Shared Services)	Handles financial planning, month-end close, AP/AR, tax, and treasury. Receives requests via budget/expense forms.
HR / People & Culture (Shared Services)	Handles recruitment, onboarding, payroll, and employee relations. Receives requests via recruitment/update forms.
Legal & Compliance (Shared Services)	Handles contract review, legal advice, litigation, and compliance monitoring. Receives requests via legal intake forms.
IT / SAP / Data Management (Shared Services)	Handles user access requests, SAP tickets, system integrations, and data governance. Receives requests via IT Service Desk.
Risk & Audit (Shared Services)	Coordinates risk registers, internal/external audits, and control testing.
Corporate Strategy & Governance	Manages Board relations, corporate strategy, and external stakeholder communications.

5. Key Performance Indicators (KPIs) & Success Metrics

Service Delivery (The "Customer" View - How well is Shared Services performing?)

- **Service Level Achievement (%)** – Percentage of internal service requests (IT, HR, Procurement) closed within SLA.
- **Service Request Response Time (Hours)** – Average time to acknowledge a new internal request.
- **Customer Satisfaction Score (CSAT)** – Satisfaction rating from internal business units on Shared Services support.
- **Audit Findings Closure Rate (%)** – Percentage of audit recommendations implemented on time.

- **Risk & Compliance Reporting Timeliness (%)** – On-time delivery of risk dashboards and compliance reports.

Strategic & Financial

- **Strategic Objective Achievement (%)** – Percentage of corporate strategic goals met on time.
- **Operating Cost Efficiency (%)** – Variance of G&A (Corporate) spend vs budget.
- **Employee Engagement Score (%)** – Overall engagement score from employee surveys.
- **Staff Turnover Rate (%)** – Annual voluntary turnover rate for corporate staff.
- **Days Sales Outstanding (DSO) / Days Payable Outstanding (DPO)** – Working capital efficiency.

6. Core Systems, Applications, and Data Flows

System / Application	Function within L0-5
SAP S/4HANA (Finance & Accounting)	Core ERP for GL, AP, AR, Fixed Assets, and Financial Reporting.
SAP SuccessFactors (HCM)	Core HR system for employee records, recruitment, performance, and payroll.
SAP Ariba (Procurement)	Central system for sourcing, purchasing, contract management, and vendor master data.
SAP Governance, Risk & Compliance (GRC)	Risk management, compliance monitoring, and internal control testing.
SAP Analytics Cloud / Power BI	Enterprise dashboarding for corporate KPIs, financial reporting, and performance management.
DMS (SharePoint) / OneDrive	Central document management for board papers, policies, and corporate records.
ServiceDesk / ITSM Platform	Ticketing system for IT, HR, and Legal service requests from internal business units.
Microsoft 365 / Teams	Collaboration, communication, and meeting management.

7. Data Governance & Administration Notes

1. **The "Intake" Rule:** All transactional requests for HR, IT, Legal, and Procurement must pass through a formal **Service Request Form (RAM-COR-SRV-001)** or **IT Service Desk ticketing system**. No work is done on verbal requests.
 2. **Policies:** All corporate policies (e.g., Delegation of Authority, HSE, HR) are managed centrally in **SAP DMS / SharePoint** and updated on an annual basis.
 3. **Audit Trail:** All Board Resolutions, Legal Contracts, and Significant Financial Variances must be archived in **SAP DMS** for a minimum of **7 years**.
 4. **Data Security:** Access to sensitive data (Payroll, Legal Counsel, Board minutes) is restricted to the Executive Leadership Team and the relevant Shared Services department heads.
-

8. Execution Playbooks (The 11 Phases)

Phase 1: Governance & Board Support Playbook

- **Primary Owner:** Head of Corporate Services / Board Secretary
- **Trigger:** Quarterly/Annual Board calendar; Urgent Board resolutions.
- **Workflow (PLAN → EXECUTE → MONITOR → IMPROVE):**
 - **Plan:** Establish annual calendar, draft meeting agendas, prepare board packs.
 - **Execute:** Facilitate board meetings, record minutes, manage board resolutions.
 - **Monitor:** Monitor board attendance, track action items, ensure quorum.
 - **Improve:** Collect feedback on Board materials, revise governance framework.
- **Major Output:** Signed Board Resolutions and Meeting Minutes (RAM-COR-GOV-002).

Phase 2: Strategy & Performance Management Playbook

- **Primary Owner:** Head of Strategy & Performance
- **Trigger:** Annual strategic planning cycle; Monthly performance reviews.
- **Workflow:** Develop Strategy & Objectives → Plan & Align Performance → Monitor Performance → Analyze & Evaluate → Report Performance → Manage Performance Improvements → Review & Update Strategy.
- **Major Output:** Strategy Development Template (RAM-COR-STR-001) and Performance Dashboards.

Phase 3: Financial Management Playbook

- **Primary Owner:** Group Finance (Shared Services)
- **Trigger:** Monthly accounting close; Annual budgeting cycle.
- **Workflow:** Plan/Prepare Budgets → Record Transactions → Manage Payables/Receivables → Manage Cash → Prepare Financial Reports → Manage Tax & Statutory Compliance → Monitor Financial Performance → Review & Improve Financial Controls.
- **Major Output:** Month-End Financial Pack, Budget Variance Report (RAM-COR-FIN-002), and Treasury reports.

Phase 4: People & Culture Management Playbook

- **Primary Owner:** HR / People & Culture (Shared Services)
- **Trigger:** Hiring request from business unit; Annual talent reviews.
- **Workflow:** Plan Workforce & Talent Needs → Attract & Recruit Talent → Onboard New Employees → Develop & Train Employees → Manage Performance → Manage Compensation & Benefits → Manage Employee Relations → Promote Health, Safety & Wellbeing → Review & Improve People Practices.
- **Major Output:** Recruitment Requisition Form (RAM-COR-PEO-001) and New Hire Onboarding Checklists.

Phase 5: Risk & Compliance Management Playbook

- **Primary Owner:** Risk / Internal Audit

- **Trigger:** Quarterly risk reviews; Regulatory changes; Incident occurrence.
- **Workflow:** Establish Risk & Compliance Framework → Identify & Assess Risks → Evaluate & Prioritize Risks → Develop & Implement Risk Treatments → Monitor Risks & Internal Controls → Ensure Compliance & Obligations → Conduct Assurance & Internal Audit → Manage Incidents & Breaches → Report Risk & Compliance Performance → Review & Improve Framework.
- **Major Output:** Updated Risk Register (RAM-COR-RCM-001) and Internal Audit Reports.

Phase 6: Stakeholder & Communications Management Playbook

- **Primary Owner:** Corporate Communications / Strategy
- **Trigger:** Stakeholder mapping; Internal newsletters; External announcements.
- **Workflow:** Identify & Map Stakeholders → Analyze Stakeholder Needs → Plan Engagement → Develop Key Messages → Approve Communication Plan → Implement Engagement Activities → Manage Internal Communications → Manage External Communications → Monitor Feedback → Review & Improve Communication.
- **Major Output:** Stakeholder Register (RAM-COR-COM-001) and Communication Plan (RAM-COR-COM-002).

Phase 7: Information & Data Management Playbook

- **Primary Owner:** IT / SAP / Data Governance (Shared Services)
- **Trigger:** User access requests; System migrations; Data quality checks.
- **Workflow:** Define Data Requirements & Standards → Collect & Capture Data → Validate & Ensure Data Quality → Store & Manage Data → Manage Data Access & Security → Integrate & Consolidate Data → Generate Reports & Analytics → Monitor Data Quality & Usage → Maintain Master Data → Review & Improve Data Management.
- **Major Output:** Data Quality Checklist (RAM-COR-IFM-002) and SAP User Access logs.

Phase 8: Asset & Facility Management (Corporate) Playbook

- **Primary Owner:** Corporate Services Admin
- **Trigger:** Purchase of new corporate IT equipment; Maintenance of HQ office.
- **Workflow:** Plan & Assess Assets & Facilities → Design & Plan Requirements → Acquire & Commission → Operate & Utilize → Maintain & Service → Ensure Health, Safety & Compliance → Monitor Performance & Conditions → Manage Lifecycle & Renewals → Dispose & Replace → Review & Improve Asset Management.
- **Major Output:** Corporate Asset Inventory Register (RAM-COR-AMF-001).

Phase 9: Communications & Stakeholder Relations Playbook

- **Primary Owner:** Corporate Communications
- **Trigger:** External event planning; Crisis communication; Media relations.
- **Workflow:** Identify Stakeholders & Communication Needs → Develop Communication Strategy & Plan → Create & Manage Communications → Engage Stakeholders & Build Relationships → Manage Events & Community Engagement → Monitor & Manage Reputation → Receive & Manage Feedback → Report & Communicate Performance → Evaluate, Improve & Strengthen Relationships → Ensure Compliance & Governance.
- **Major Output:** External Communication Reports, Press Releases, and Media Monitoring Logs.

Phase 10: Review & Improve People Practices Playbook

- **Primary Owner:** HR / People & Culture
- **Trigger:** Annual HR audit; Employee engagement survey results.
- **Workflow:** Establish Review Framework → Collect & Analyze Performance Data → Evaluate People Practices → Identify Gaps & Opportunities → Develop Improvement Actions → Implement Improvements → Monitor & Measure Impact → Standardize & Document → Communicate Outcomes → Continuous Improvement.
- **Major Output:** People Practices Review Report (RAM-COR-PIP-001), Policy Updates.

Phase 11: Report & Enhance Governance Playbook

- **Primary Owner:** Head of Corporate Services
 - **Trigger:** Annual reporting cycle; Board feedback.
 - **Workflow:** Define Governance Reports → Compile Board & Committee Reports → Meet Regulatory Reporting Obligations → Disclose & Communicate Performance → Evaluate Governance Effectiveness → Identify Enhancement Opportunities → Update Governance Frameworks → Implement Governance Improvements → Track Improvements & Outcomes → Archive Records & Learning.
 - **Major Output:** Annual Governance Report (RAM-SOV-REP-001) and Updated Board Resolutions.
-

9. Standard Operating Procedure (SOP) – Shared Services Monthly Internal SLA Review

SOP Number: RAM-L0-5-SOP-001

Frequency: Monthly (Third Thursday)

Duration: 60 Minutes

Chair: Head of Corporate Services & Governance

Attendees: Shared Services Leads (Finance, HR, IT, Legal, Procurement).

Meeting Agenda & Flow:

- **0-15 mins: Service Request Health Check:** Review of open service requests (IT tickets, HR requisitions, Legal intake) that are exceeding SLAs.
- **15-30 mins: Internal Customer Satisfaction Review:** Review CSAT scores from business units (L0-1 to L0-4) regarding Shared Services support. Discuss root causes of dissatisfaction.
- **30-45 mins: Risk & Compliance Dashboard:** Review of open audit findings, risk register status, and compliance report deadlines.
- **45-60 mins: Financial & Strategic Health:** Review of G&A budget variance, corporate KPIs, and Board preparation status for the next meeting.

- **Outputs:** Action Tracker (COR-COM-008) updated with owners for delayed tickets or complaints.

10. Core Forms & Templates Library (RAM-COR-XXX)

Because L0-5 is a **Service Provider**, the most important form is the **Unified Service Request Form**. Below are the **12 essential forms** required for L0-5 governance, designed in single-field tabulated formats.

FORM RAM-COR-SRV-001: CORPORATE SERVICE REQUEST FORM

Purpose: The universal intake form for all internal requests to L0-5 Shared Services.

Document Control		Field Details
Form Code:	RAM-COR-SRV-001	Request ID: [SR-YYYY-XXX]
Phase:	All Phases	Date Submitted: [DD/MM/YYYY]
Owner:	Shared Services Desk	Submitted By: [Name/Dept]
Request Type		Description / Details
☐ IT / SAP Support		[Describe Issue/Request]
☐ HR / Recruitment		[Position Title / Job Description]
☐ Legal / Contract Review		[Contract Name / Vendor]
☐ Finance / Budget Request		[Amount / Purpose]
☐ Procurement / Purchase Order		[Item Description / Vendor]
Priority:	☐ P1 - Critical ☐ P2 - High ☐ P3 - Normal ☐ P4 - Low	
Target Completion / SLA:	[DD/MM/YYYY]	
Assigned To (Shared Services):	[Name]	

Requestor Signature: _____

FORM RAM-COR-GOV-001: BOARD MEETING AGENDA TEMPLATE

Purpose: Standard template for Board and Committee meeting planning.

Document Control		Field Details	
Form Code:	RAM-COR-GOV-001	Meeting Date: [DD/MM/YYYY]	
Phase:	Phase 1	Meeting Type: [] Board [] Audit [] Risk [] Strategy	
Owner:	Corporate Secretary	Start Time: [HH:MM]	
Agenda Item	Presenter	Duration	Required Materials (DMS Reference)
1. Call to Order & Quorum	Chair	5 min	-
2. Previous Meeting Minutes Approval	Secretary	10 min	[File Ref]
3. CEO Strategic Update	CEO	20 min	[Slide Deck Ref]
4. Financial Performance Review	CFO	20 min	[Financial Pack Ref]
5. Major Investment Approval	CIO	15 min	[Business Case Ref]
6. Any Other Business (AOB)	Chair	10 min	-

FORM RAM-COR-GOV-002: BOARD RESOLUTION FORM

Purpose: To formally record decisions made by the Board of Directors.

Document Control		Field Details
Form Code:	RAM-COR-GOV-002	Resolution #: [RES-YYYY-XXX]
Phase:	Phase 1	Meeting Date: [DD/MM/YYYY]
Owner:	Corporate Secretary	Agenda Item #: [Number]

Resolution Statement (Motivation):

[Text Field: "The Board approves the acquisition of XYZ Asset, as presented..."]

Voting Record		
Motion Proposed By:		[Name]
Motion Seconded By:		[Name]
Votes For:		[Number]
Votes Against:		[Number]
Abstentions:		[Number]
Resolution Status:	☐ Approved ☐ Rejected ☐ Tabled	
Corporate Secretary Signature:	_____	

FORM RAM-COR-STR-001: STRATEGY DEVELOPMENT TEMPLATE

Purpose: To formalize the corporate strategic objectives and cascading initiatives.

Document Control		Field Details		
Form Code:	RAM-COR-STR-001	Strategy Period: [YYYY-YYYY]		
Phase:	Phase 2	Version: [v1.0]		
Owner:	Head of Strategy	Date Approved: [DD/MM/YYYY]		
Strategic Pillar	Strategic Objective	Owner	Success KPI	Target Date
[e.g., Financial Growth]	[e.g., Increase Portfolio GAV by 10%]	[CFO]	[GAV (\$)]	[Date]
[e.g., Operational Excellence]	[e.g., Reduce OpEx per sqm by 5%]	[COO]	[\$/sqm]	[Date]

Approved By (CEO): _____

FORM RAM-COR-FIN-001: BUDGET TEMPLATE

Purpose: Template for business units to submit their annual budget requests to Group Finance.

Document Control		Field Details
Form Code:	RAM-COR-FIN-001	Budget Year: [YYYY]
Phase:	Phase 3	Department / L0 Stream: [e.g., L0-4 Operations]
Owner:	Dept. Head	Date Submitted: [DD/MM/YYYY]
Cost Category	Annual Request (\$)	Justification
Salaries & Wages	\$ [Number]	[Text]
External Vendors / Contractors	\$ [Number]	[Text]
Utilities / Consumables	\$ [Number]	[Text]
Capital Expenditures (CapEx)	\$ [Number]	[Text]
Training / Travel	\$ [Number]	[Text]
Total Requested Budget:	\$ [Number]	
Approval		
Finance Manager:		
Dept. Director:		

FORM RAM-COR-FIN-002: BUDGET VARIANCE REPORT

Purpose: Monthly report comparing actual spend against budget.

Document Control		Field Details			
Form Code:	RAM-COR-FIN-002	Period: [Month, Year]			
Phase:	Phase 3	Dept.: [Text Field]			
Owner:	Finance Controller	Date: [DD/MM/YYYY]			
Cost Category	Budget YTD (\$)	Actual YTD (\$)	Variance (\$)	Variance (%)	Explanation

Operating Costs	\$ [Number]	\$ [Number]	\$ [Number]	[%]	[Text]
Maintenance	\$ [Number]	\$ [Number]	\$ [Number]	[%]	[Text]
Salaries	\$ [Number]	\$ [Number]	\$ [Number]	[%]	[Text]
Sign-off					
Finance Controller:					

FORM RAM-COR-PEO-001: RECRUITMENT REQUISITION FORM

Purpose: Formal request to HR to open a new position or backfill.

Document Control		Field Details
Form Code:	RAM-COR-PEO-001	Req ID: [REQ-YYYY-XXX]
Phase:	Phase 4	Requesting Dept.: [Text Field]
Owner:	Hiring Manager	Date: [DD/MM/YYYY]
Position Details		
Job Title:	[Text Field]	
Reporting To:	[Name]	
Employment Type:	[] Full-Time [] Part-Time [] Contractor	
Budget Approval Reference:	[RAM-COR-FIN-001 Ref]	
Justification for Role:	[Text Field]	
HR Approval		
HR Manager:		

FORM RAM-COR-RCM-001: RISK REGISTER

Purpose: Master log of all enterprise risks identified and tracked.

Document Control		Field Details
Form Code:	RAM-COR-RCM-001	Register Date: [DD/MM/YYYY]

Phase:		Phase 5			Version: [v1.0]			
Owner:		Risk Management			Next Review: [DD/MM/YYYY]			
Risk ID	Risk Category	Risk Description	Likelihood (1-5)	Impact (1-5)	Risk Score	Mitigating Controls	Action Owner	Status
[RSK-001]	Financial	[Text]	[3]	[4]	[12]	[Text]	[Name]	[Open / Closed]

FORM RAM-COR-RCM-003: RISK TREATMENT PLAN

Purpose: To document the mitigation actions assigned to address high or extreme risks.

Document Control		Field Details
Form Code:	RAM-COR-RCM-003	Risk Reference: [RSK-001]
Phase:	Phase 5	Date: [DD/MM/YYYY]
Owner:	Risk Owner	Risk Rating: [High / Extreme]
Mitigation Plan

OPERATIONAL REGISTERS (MASTER LOGS) GUIDELINES

To manage the L0-5 Shared Services model effectively, the following **6 Master Registers** must be maintained (using Excel or SharePoint Lists):

Guideline:

These are maintained by the **Shared Services Desk / Admin** and serve as the "Service Management Dashboard" for L0-5.

1. COM-REG-COR-001: SERVICE REQUEST REGISTER (Live Log)

- **Columns:** Request ID | Date | Requestor | Service Type | Priority | Assigned To | Status | SLA End Date.

2. COM-REG-COR-002: BOARD RESOLUTIONS REGISTER

- **Columns:** Resolution # | Meeting Date | Agenda Item | Decision | Action Owner | Target Date.

3. COM-REG-COR-003: FINANCIAL BUDGET TRACKER

- **Columns:** Department | Budget (\$) | Actual YTD (\$) | Variance (\$) | Forecast (\$).

4. **COM-REG-COR-004: RISK & AUDIT REGISTER**

- **Columns:** Risk ID | Risk Description | Rating | Mitigation Owner | Due Date | Status.

5. **COM-REG-COR-005: HR RECRUITMENT TRACKER**

- **Columns:** Req ID | Position | Hiring Manager | Date Posted | Status | Hire Date.

6. **COM-REG-COR-006: COMMUNICATION & STAKEHOLDER LOG**

- **Columns:** Stakeholder Name | Communication Date | Type (Internal/External) | Key Message | Feedback.
-

How to Deploy L0-5:

1. **SharePoint Central Hub:** Create a SharePoint site named **RAM_L0-5_Corporate_Services**. House all policies, the 6 Registers (as SharePoint Lists), and the master form templates here.
2. **Service Desk Integration:** Do not rely solely on the paper form (RAM-COR-SRV-001). Integrate that form into an **ITSM / Service Desk software** (e.g., Jira Service Desk, ServiceNow, or the SAP Portal) so internal users can submit requests online, and the system auto-tracks SLAs.
3. **Governance:** Ensure every Request submitted via the Service Desk is classified by Priority. If P1/Critical, it auto-escalates to the Head of Corporate Services.

ITIL SUMMARY: RAM CORPORATE SERVICES & SHARED SERVICES MANAGEMENT FRAMEWORK

Based on L0-5 Value Stream (Enablers & Group Support)

The ITIL model for RAM Corporate Services treats every internal business unit (L0-1 to L0-4) as an **Internal Customer**, and the Group Shared Services departments (Finance, HR, IT, Legal, Procurement) as the **Service Provider**.

1. ITIL Service Strategy (The "What" and "Why")

Objective: To define what services the Group Shared Services provides to RAM and why they matter.

- **Service Portfolio:** RAM's internal Service Catalog includes:
 - **IT & SAP Support:** User access, system errors, reporting requests.
 - **HR Services:** Recruitment, payroll queries, onboarding.
 - **Financial Services:** Budget requests, invoice approvals, GL account coding.
 - **Legal Services:** Contract reviews, legal advice, litigation management.
 - **Procurement Services:** Purchase Orders (POs), vendor onboarding, tender processes.
 - **Customer Segments:** L0-1 (Strategy), L0-2 (Capital Projects), L0-3 (Leasing), L0-4 (Operations).
 - **Service Level Agreements (SLAs):** Standard response times are defined per priority level (See Section 5).
-

2. ITIL Service Design (The "How" - Structure and Policies)

Objective: To design the intake processes, rules, and systems to handle corporate service requests efficiently.

- **The Service Desk (Single Point of Contact - SPOC):**

- All internal requests from RAM business units must go through a **Service Desk** (ITSM Platform or Email Intake).
 - The Service Desk acts as the "Gatekeeper" to prevent back-door requests, ensuring all work is tracked, SLAs are measured, and departmental workloads are balanced.
 - **Service Catalogs & Request Models:**
 - The Service Desk offers predefined "Request Models" (templates) for common requests (e.g., "New Hire IT Setup," "Vendor Contract Review," "Budget Journal Entry"). This ensures consistent data capture.
 - **Escalation Matrix (Major Incident Protocol):**
 - **P1 (Critical):** System-wide SAP outage, cyber-security breach, HR payroll failure.
 - *Escalation:* Immediate notification to CIO/Head of Corporate Services. 24/7 emergency response.
 - **P2 (High):** Single user SAP block, urgent legal contract for pending acquisition.
 - *Escalation:* Department Manager (CIO, HRD, Legal Director). Response within 4 hours.
-

3. ITIL Service Transition (The "Change" - Implementation)

Objective: To manage how new policies, systems, or corporate initiatives are rolled out to RAM's business units.

- **Change Advisory Board (CAB):**
 - Major changes to corporate systems (e.g., upgrading SAP, changing HR payroll providers, launching a new IT security policy) are assessed, tested, and approved by a cross-functional **CAB**.
 - **CAB Members:** Head of IT, Head of Finance, Head of HR, Head of Compliance, and a Business Unit Representative (e.g., L0-4 Head of Ops).

- **Knowledge Management (KM):**

- All known fixes for common corporate service requests (e.g., how to reset an SAP password, how to submit a travel expense claim) are documented in a **Knowledge Base (KB)**.
- Objective: **First Call Resolution (FCR)**. If a RAM user has a basic question, they can self-serve via the KB, reducing the ticketing volume for Shared Services.

4. ITIL Service Operation (The "Execution" - Daily Workflow)

Objective: The day-to-day execution of the L0-5 manual. **You do not use a single paper form anymore; you use a Service Desk Ticket.**

The lifecycle of a standard request (RAM-COR-SRV-001) becomes an **ITIL Service Request Ticket**:

ITIL Stage	Action / Workflow	Who Performs
1. Request Fulfillment	A RAM Business Unit (e.g., L0-4 Operations) logs a request via the ITSM Portal. They select "Request Type" and "Priority".	Internal Customer (RAM User)
2. Incident / Service Categorization	The Service Desk System auto-assigns the ticket to the relevant Group Shared Services team (e.g., Finance Team).	Service Desk / Auto-routing
3. Assignment & Triage	The Team Lead (e.g., Finance Manager) checks the ticket and assigns it to a specific Specialist (e.g., Accounts Payable Officer).	Team Lead / Service Owner
4. Investigation & Diagnosis	The Specialist analyzes the request, gathers data (e.g., checks SAP), and prepares the response (e.g., processes the payment).	Specialist (Shared Services)
5. Resolution & Implementation	The Specialist performs the work (e.g., approves the PO). They update the ticket with a "Resolution Note."	Specialist (Shared Services)

ITIL Stage	Action / Workflow	Who Performs
6. Closure & Customer Feedback	The system triggers an automated satisfaction survey (CSAT) to the RAM Business Unit. The ticket is closed after feedback is received.	Service Desk System

5. ITIL Key Performance Indicators (KPIs) & Service Level Agreements (SLAs)

Since L0-5 operates through Group Shared Services, the performance metrics are strictly SLA-driven.

Service Level Agreement (SLA) Category	Target / KPI	Measurement Notes
1. Service Desk Availability	99.5% Uptime	ITSM portal and email intake must be operational during business hours.
2. Response Time (P1 Critical)	< 15 Minutes	Immediate triage for critical system or legal failures.
3. Response Time (P2 High)	< 4 Hours	Acknowledgement of the request by the shared services team.
4. Response Time (P3 Normal)	< 24 Hours	Acknowledgement of standard service requests.
5. Resolution Time (P1/P2)	As per urgency, usually < 24 hours	Critical problems (SAP down) must be resolved or bypassed immediately.
6. First Contact Resolution Rate (FCR)	≥ 80%	Percentage of requests closed at the first level of intake without needing to escalate to a specialist.
7. Internal Customer Satisfaction (CSAT)	≥ 4.5 / 5.0	Automated survey sent to the RAM Business Unit upon ticket closure.
8. Mean Time to Resolve (MTTR)	Tracked per department	Average time to close a ticket. Used to identify bottlenecks (e.g., Legal is taking too long).

6. ITIL Continual Service Improvement (CSI)

Because L0-5 manages the entire corporate governance of RAM, it must constantly improve its own internal efficiency.

- **Weekly/Quarterly Service Reviews:** Group Shared Services department heads (Finance, IT, HR, Legal) meet weekly for 30 minutes to review the **ITIL Performance Dashboard**.
 - *What they look at:* Tickets exceeding SLAs, departments submitting excessive requests, and recurring patterns of errors.
 - **Problem Management (Root Cause Analysis):** If a specific type of ticket keeps recurring (e.g., "SAP user lockout"), the Shared Services team documents the root cause and implements a **Proactive Fix** (e.g., altering an SAP security profile or updating the Knowledge Base) to prevent future tickets.
 - **Policy & Procedure Updates:** Lessons learned from the ITIL framework are fed back into the L0-5 manual. For example, if 100% of IT tickets are due to missing forms, the Service Request process is streamlined in the L0-5 manual to eliminate that bottleneck.
-

Summary for Deployment

For your RAM Group Shared Services team, this ITIL summary means you **do not** rely on paper forms or informal emails (like RAM-FRM-SRV-001). Instead:

1. **You deploy a live ITSM Portal** (e.g., Jira Service Management, ServiceNow, or SAP Standard Service Desk).
2. **You map the RAM-FRM-SRV-001 data fields** into the ITSM Portal's "Request Form."
3. **You enforce the SLA priorities** (P1 = Critical, P2 = High, P3 = Normal) so business units know exactly how fast they will get a response.
4. **You review the ITIL Dashboard monthly** to ensure the 99% outsourced shared services model is running with "Zero" bottleneck failures.

ISO 27001 SUMMARY: RAM CORPORATE SERVICES & INFORMATION SECURITY MANAGEMENT FRAMEWORK

Based on L0-5 Value Stream (Enablers & Group Support)

The ISO 27001 framework for RAM Corporate Services treats **Data and Information** as critical corporate assets. The L0-5 team (specifically IT, HR, Legal, and the Data Governance team) acts as the **ISMS Custodian**, ensuring that every corporate service request, system change, and data transfer is secure, traceable, and compliant.

1. The Core Principle: CIA Triad

ISO 27001 is built on protecting the **Confidentiality, Integrity, and Availability (CIA)** of information.

CIA Pillar	RAM L0-5 Implementation
Confidentiality	Only authorized L0-5 Shared Services staff can access board minutes, payroll data, and legal contracts. Access is strictly role-based (RBAC).
Integrity	Financial records (L0-5 Phase 3) and SAP Master Data cannot be altered without an audit trail and formal approval workflow (SAP GRC controls).
Availability	Group Shared Services ensures the ITSM Portal, SAP, and HR systems remain operational (99.5% uptime) so RAM business units can submit requests.

2. The ISMS Scope for RAM Corporate Services

Scope Statement: *The ISO 27001 ISMS applies to all Group Shared Services (Finance, HR, IT, Legal, Procurement) and the corporate governance data they process, store, and transmit across the RAM enterprise.*

Within your L0-5 manual, this translates into mandatory **Security Controls** for specific phases:

L0-5 Phase	ISO 27001 Annex A Control	RAM Implementation
Phase 1 (Governance)	A.5.15 Access Control	Board papers are stored in a secure SharePoint site with restricted access. Board meeting links require authentication.
Phase 3 (Finance)	A.5.33 Financial Information Security	Bank account details and tax records are encrypted in SAP. Users cannot query financial reports without explicit SAP FICO authorization.
Phase 4 (HR)	A.6.2.1 Screening	All RAM employees (and contractors) undergo background checks before accessing L0-5 systems. Payroll files are encrypted.
Phase 5 (Risk & Compliance)	A.5.5 Contact with Authorities	The L0-5 Risk team must have a documented procedure for notifying regulatory authorities in case of a data breach (within 72 hours if GDPR applies).
Phase 7 (Data/IT)	A.8.10 Backup & Recovery	All L0-5 systems (SAP, SharePoint, ITSM) must have automated backups with a Recovery Time Objective (RTO) of < 4 hours.

3. The ISO 27001 PDCA Cycle (Plan-Do-Check-Act)

The L0-5 manual provides the **Process Framework**, but ISO 27001 requires a **Continuous Improvement Cycle** around it:

PDCA Stage	RAM L0-5 Application
P (Plan)	Define the Information Security Policy. Classify corporate data (Public, Internal, Confidential, Restricted). Assign security roles.
D (Do)	Execute access control, enforce password policies, conduct mandatory annual security awareness training for all RAM staff, and process service requests through the ITSM portal.
C (Check)	Conduct quarterly internal audits of SAP access logs. Review who has access to financial and legal folders. Test system backups.
A (Act)	Address audit findings. Update the L0-5 Corporate Services manual if a security gap is found. Implement new security patches.

4. Security Roles & Responsibilities (L0-5 Ownership)

In a 27001-certified environment, specific L0-5 roles are formally designated:

RAM Role	ISO 27001 Equivalent	Key Responsibility
Head of Corporate Services	Information Security Owner	Ultimate accountability for the ISMS. Approves security policies and allocates resources for security improvements.
IT / SAP Administrator	System Administrator	Manages SAP user access, enforces password complexity, and applies security patches to systems.
HR Manager	Personnel Security Owner	Ensures NDAs are signed, background checks are performed, and exit procedures (revoking access) are strictly followed when an employee leaves.
Legal / Risk Officer	Compliance & Audit Owner	Verifies that L0-5 processes comply with data privacy laws (GDPR, local Data Protection) and conducts internal security audits.
All L0-5 Staff (Shared Services)	Data Custodians	Must complete mandatory annual security training and immediately report any suspicious emails or potential data breaches.

5. Asset Management & Data Classification

ISO 27001 requires **defining and classifying** every piece of data the L0-5 team handles.

RAM Data Classification Matrix:

Classification	Definition	Examples (L0-5)	Access Restriction
Public	Data meant for public consumption. Can be shared freely.	Annual Corporate Reports, Press Releases, Job Postings.	None.

Classification	Definition	Examples (L0-5)	Access Restriction
Internal	General business information. Can be shared across RAM staff.	Policies, Standard Operating Procedures, Meeting Calendars.	All RAM employees (VPN required for remote).
Confidential	Sensitive business data. Restricted to specific departments.	Board Meeting Minutes, Monthly Financial Packs, Vendor Contracts, HR Payroll Files.	Executive Leadership + Shared Services Dept. only. Multi-Factor Authentication (MFA) required.
Restricted	Highly critical, legally protected, or personally identifiable data.	Bank Account Numbers, Employee IDs, Tax Registry, Passports, Litigation documents.	Limited to 1-2 authorized data stewards. Encrypted at rest and in transit.

6. ISO 27001 Key Performance Indicators (KPIs) vs. ITIL KPIs

While ITIL KPIs measure *speed* (e.g., how fast a ticket is closed), **ISO 27001 KPIs measure *security and compliance***:

Security KPI	Target	Measurement Method
Security Awareness Training Completion	100%	All L0-5 staff and internal RAM users must complete annual training.
Access Review Completeness	100% Quarterly	The IT Admin reviews SAP and SharePoint access lists every 90 days and removes terminated users immediately.
Time to Revoke Access (Terminated Employee)	< 1 Hour	Automated deactivation in SAP HR and Active Directory as soon as an offboarding ticket is raised.
Number of Privileged Access Accounts	< 5	Only SAP Admins and Finance Controllers have system-wide/root access.
Security Incident Response Time (P1)	< 1 Hour	Immediate lockdown of compromised accounts upon breach detection.

Security KPI	Target	Measurement Method
Audit Findings Closure Rate	100%	All non-conformities identified in the annual ISO audit must be closed within 30 days via a Corrective Action Plan (CAPA).

7. Operationalized via L0-5 Service Desk (ITSM)

To enforce ISO 27001 in your daily L0-5 operations, the ITSM Portal (mentioned in the ITIL summary) must include a **"Security & Access" Request Category**.

When a RAM business unit (L0-1 to L0-4) requests a **"New User Access to SAP,"** the L0-5 ITSM workflow must enforce the following 27001 controls:

1. **Identity Verification:** The requester must provide a formal approval email from the Department Head (Proof of Authorization).
2. **Role-Based Access Control (RBAC):** The IT Admin does *not* grant blanket access. They must assign only the specific SAP roles relevant to the user's job function.
3. **Record Keeping:** The ticket is kept open. The IT Admin cannot close the ticket until the user has successfully logged in, and the access audit trail has been logged in the system.
4. **Segregation of Duties (SoD):** A 27001 requirement. The IT Admin who *grants* the access cannot be the same person who *approves* the access.

Summary for RAM L0-5 Deployment:

To comply with your Group's ISO 27001 requirements, you do not simply run L0-5 as a "service provider." You act as a **Security Gatekeeper**. When implementing the forms and processes from the L0-5 manual:

1. **Add a "Data Classification" header** to every official form (RAM-COR-GOV-001, RAM-COR-FIN-001, etc.) so employees must mark it as *Internal, Confidential, or Restricted*.
2. **Enforce Password Policies:** Every L0-5 service request must be tied to the user's SAP/Active Directory single sign-on (SSO).
3. **Automate Offboarding:** Ensure that when a request for "Employee Exit" (Phase 4) is processed in the ITSM portal, it simultaneously triggers an **"Access Revoke" ticket** to the IT and SAP teams.
4. **Annual Audits:** Use the L0-5 Phase 11 (Report & Enhance Governance) and Phase 5 (Risk & Compliance) processes to formally document the annual external ISO 27001 audit.
